Profile

AI Risk & Operations professional with experience spanning enterprise AI deployment, technical operations, and model evaluation.

Focused on making failure modes observable and actionable, bridging the gap between policy, engineering, and real-world system behavior.

Experience across Google, Palantir, and independent AI risk research.

Selected Project

AI Risk Control Pipeline | GitHub

github.com/ssloves/ai_risk_control_pipeline

- Built a multi-dimensional AI risk audit framework spanning deception, power-seeking, honesty, and harmlessness
 - Developed workflows for perturbation, drift detection, mitigation, and behavioral validation
 - Investigated failure modes when transferring interventions from toy models to GPT-2, documenting representation collapse, sign mismatches, and non-selective steering
-

Experience

Modu Labs | AI Research Program

Mar 2026 - Present, Seoul, South Korea

- Completed advanced coursework in ML, LLM evaluation, and model behavior analysis.
- Conducted independent research on AI risk, evaluation, and controllability.

Independent Venture | Self-employed

Aug 2024 - Mar 2026, Seoul, South Korea

- Built and operated a consumer products venture, leading product development, operations, and customer acquisition.

Palantir | Business Development, AIP & Foundry

Aug 2023- Aug 2024, Seoul, South Korea

- Built Palantir Korea's enterprise AI go-to-market from zero, qualifying 4 enterprise accounts and 170+ leads across financial, semiconductor, and aviation sectors in the first year.
- Surfaced deployment risks, operational constraints, and adoption blockers across complex enterprise engagements before they reached production.
- Coordinated Sales, Engineering, Legal, and partners (Samsung SDS, LG CNS, SK C&C) to align deliverables and resolve conflicts, shortening engagement cycles by ~25%.
- Built Palantir Korea's first pipeline- and partner-tracking structure for global leadership, improving forecasting accuracy and cross-team visibility.

Google | Technical Solutions Specialist, Android/Google TV

May 2021 - Jun 2022, Seoul, South Korea

- Primary technical interface for 3 OEM/ODM partners across APAC; investigated partner-reported system failures and coordinated engineering escalations to resolution.
- Built performance dashboards for leadership, improving visibility into partner health, quality, and operational risk.
- Optimized onboarding and certification workflow (–30% turnaround) while ensuring on-time launch and certification compliance.
- Worked with engineering and product teams globally to resolve critical quality issues pre-launch.

Education

University of Illinois at Urbana-Champaign / B.S. in Chemistry

May 2019, Champaign, IL

Member of Phi Eta Sigma National Honor Society

Certifications

Artificial Intelligence Governance Professional (AIGP)

Issued Mar 2026 by IAPP
